

CLIMATE NEUTRAL AVIATION: ELECTRIC AIRCRAFT IN EXCHANGE FOR SUITABLE AREAS

Pipistrel Velis Electro

GET YOUR OWN ELECTRIC AIRCRAFT WITHOUT ANY INVESTMENT!

The future of aviation, silent and without emissions: In exchange for areas which are suitable for the installation of photovoltaic systems we offer a free electric aircraft. Make profit out of your fallow areas:

- Roof top areas > 1,000 m²: infrastructure for electromobility
- Open space areas > 50,000 m²: Pipistrel Velis electro*

On request, we also implement projects with flexible rental or lease models.
This is how your airfield could look like:

PHOTOVOLTAIC SYSTEMS BY WINDPOWER:

We design your solar installation as a holistic infrastructure project. Provide us with your areas - we bring everything else:

- Financing resources
- Know-how in planning and implementation competence
- Preparation of infrastructure for charging your future electric aircrafts and electric cars

If you want to benefit from your fallow areas now, contact us - we are looking forward to your message:
